

# Storage and falling objects

⌚ Duration : 60min

FRENCH

ENGLISH

SPANISH

While high-level storage methods optimize available surfaces and volume, they also introduce potentially significant risks, particularly when forklifts, electric pallet jacks, or other vehicles are present.

A falling load or a collapsing stack or storage rack can result in severe consequences if an employee is in the vicinity.

## 🎯 Target audience

It is intended for all employees who handle the stacking, storing, securing, or management of goods, materials, substances, or equipment within the facility. It is also intended for supervisors who oversee these activities, and for employees working nearby.

## ☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

## 🔑 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

## ⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.

# Targeted learning

## Storage and falling object

Module 1	<b>Introduction</b>
Module 2	<b>Understanding the danger</b> <ul style="list-style-type: none"> <li>– Physics of falling objects</li> </ul>
Module 3	<b>Keep people safe</b> <ul style="list-style-type: none"> <li>– Eliminating the presence of pedestrians</li> <li>– Implementing anti-fall protectors</li> <li>– Protecting pedestrians through distancing</li> <li>– Limiting the height of loads</li> <li>– Safety rules, training and information</li> </ul>
Module 4	<b>Pallets and palletized unit load</b> <ul style="list-style-type: none"> <li>– Regularly inspect pallets</li> <li>– Choosing the right pallet</li> <li>– Building a stable stack</li> <li>– Wrapping and strapping techniques</li> </ul>
Module 5	<b>Floor stacking</b> <ul style="list-style-type: none"> <li>– Stability of the stack</li> <li>– Safe stacking height</li> <li>– Jumbo rolls</li> <li>– Bales</li> <li>– Pyramid method</li> <li>– Storage of deformed/damaged bundles</li> <li>– Empty pallets</li> </ul>
