

# Electrical hazard awareness

🕒 Duration : 30min

FRENCH

ENGLISH

SPANISH

Today, electricity is the most widely used form of energy, as it is an essential part of everyday life. It is present in all workplaces, not only in electrical rooms, but all around us. Omnipresent, colorless and odorless, electricity is not without risk.

It is therefore important to continually raise awareness among as many people as possible in order to curb the accidents that occur and that sometimes result in worker death.

## 🎯 Target audience

She is intended for workers who are not electricians and who do not perform electrical work but who operate in areas where electrical risks exist.

## ☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

## 🔑 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

## ⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.

# Targeted learning

## Electrical hazard awareness

<b>Module 1</b>	<b>Introduction</b>
<b>Module 2</b>	<b>Electrical hazards - Part 1</b>
