

# Transportation of dangerous goods

⌚ Duration : 90min

FRENCH

ENGLISH

SPANISH

Industrial activities involving hazardous materials expose not only workers but also the population and the environment to risks that could be qualified as « supplementary ». There are major issues surrounding the transportation of hazardous goods.

This is why mastering the applicable regulation is vital for stakeholders. All stakeholders, both shippers and carriers, have the duty to ensure that they fully understand their role.

## 🎯 Target audience

It is mainly intended for logistics personnel, business executives as well as any person handling and carrying regulated hazardous materials in Canada.

## ☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

## 🔑 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

## ⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.

It is **MANDATORY** for the handler to keep their TDG certificate with them, duly signed by both the employer and themselves, in either certificate or pocket format.
